Watlow EZ Zone Up-grade**Details**

The Mattson Watlow system 988 has been obsoleted from the Watlow catalogue. A replacement up-grade is available.

The replacement EZ Zone controller has to be specially configured to be able to work with the grounded Thermal couple of the Mattson heater.

The EZ Zone controller has to be specially programmed after the configuration, to set up the correct working parameters for the Aspen II system.

Examples are. The set point, highest possible temperature, the range, the trigger and the scaling.

These are possible to set up on the EZ zone controller with some help about understanding the function keys.

A pre-programmed ready to plug and play system is available. All the correct setting are installed and no further programming is required.

A wiring plan is available to help with the installation.

**Benefits**

- Plug and Play EZ Zone controller
- Many hours of configuration set-up is saved
- Perfect fit and function up-grade
- Perfect technical support
- All specification have been checked and confirmed
- An easy installation guide available
- Quick delivery
- Further tool sets can be programmed
