

**Product Title**

Q1 2024

**263-02156-00 MOTOR ASSY,DC**  
**933-14005-00 MOTOR,DC,SHUTTLE ROTATE****Details**

Introducing the New solution to the Robot Extension/Rotation Motor and the Shuttle rotation end of life product situation.

The manufacture issues a last buy scenario in 2022. These motors are unavaliabile all stock have now been depleted.

Transition seamlessly from unavailability with our groundbreaking motors designed to replace the elusive originals

Quality Assurance: Rest easy knowing the new motors come directly from the original manufacturer, maintaining the high standards and reliability you expect for your robot's operation.

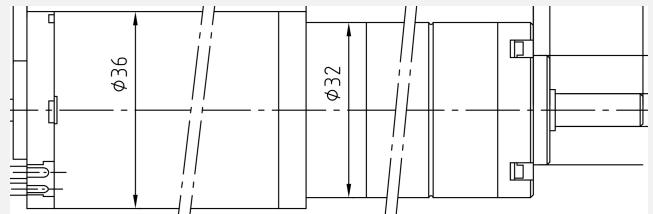

The exact same motor gearbox 93:1 for Robot Rotation/Extension and 308:1 for the Shuttle platform rotation are still used. The motor has a little larger in Dimension.

Effortless Installation: Upgrade hassle-free with our plug-and-play design. The new motors share the same size for installation, ensuring a smooth swap without any modifications or specialized tools.

Continuous motor supply now secured and all technical concerns on the end of life scenario for this product has now been addressed.

By assured that these motors have been fully tested by JVT-Support.

To order use part numbers 263-02156-01 and 933-14005-01

**Benefits**

- Plug and Play installation
- Very reliable up-grade
- Easy Installation
- Quality Assurance
- Compatibility Upgrade
- Continuous support
- Technical support available
- On-Site support
