NEW Watlow PM PLUS Up-grade**Details**

Watlow has removed the EZ zone controller from their product line and replaced it with the new PM PLUS model.

The replacement PM PLUS controller has to be specially configured to be able to work with the grounded Thermal couple of the Mattson heater.

Examples are: The set point, highest possible temperature, the range, the trigger and the scaling.

These are possible to set up on the PM PLUS controller with some help about understanding the function keys.

The PM PLUS new touch buttons are easy to use. To reach the menu press the > and then the - button to move down the list, the > to reach the input area and the * or - button to change the input. With < button return to previous screen and the Home button to return to Home.

A pre-programmed controller, ready to Plug and Play system is available. All the correct settings are installed and no further programming is required. JVT-Support has completed and tested the new programming.

A wiring plan is available to help with the installation.
